• TNG FINHACK 2026

Sendiri tak mampu, ramai-ramai boleh.

Team R2-D2

DuitLater

Sendiri tak mampu, ramai-ramai boleh.

Pool PayLater untuk komuniti B40 di Malaysia.

Team R2-D2 · KrackedDevs

The Gap

RM 300 doesn't buy a sewing machine.

Mak Cik Aminah dari Felda Gedangsa ada TNG eWallet. PayLater allowance dia: **RM 300**.

Dia nak mesin jahit untuk start home tailoring side income — **RM 1,800**. Sendiri tak mampu.

Tapi dengan enam jiran dia, gabung PayLater allowance — **RM 2,000+**. Cukup. Lebih.

The numbers:

- **23M+** TNG eWallet users · rails dah ada di poket setiap orang
- **15%** rakyat Malaysia masih unbanked atau underbanked
- **2.9M** isi rumah B40 nasional
- **0** mekanisme dalam TNG eWallet untuk gabung PayLater antara users

Individual limits. Communal needs. Platform missing.

DuitLater

Pool PayLater. Beli yang sendiri tak boleh.

1. **Form pool** 2–8 ahli daftar di NADI centre · staff bantu pool formation
2. **Combine PayLater** Sum of individual TNG limits · combined cap pool muncul
3. **Penasihat (AI · BM-first)** Cadangkan top-5 barang dari katalog MyKasih MySARA
4. **Pool vote & buy** Majoriti setuju · TNG approve · NADI sahkan delivery · ahli bayar balik bulanan

Empat institusi Malaysia, satu rail TNG:

TNG (PayLater) · **NADI / MCMC** (community facilitator · 188 centres) · **MyKasih** (MySARA catalogue · 10,000+ merchants) · **B40 households** (the pool)

Tiada welfare baru. Tiada lender baru. Cuma compose institusi yang dah ada.

Five Criteria · Five Answers

Kriteria	Bagaimana DuitLater jawab
AI & Intelligent Systems	Tiga lapisan — (1) AI generate 2,400+ baris planning artifacts sebelum kod ditulis · (2) maji-core team coordinator enforce phase gates + memory · (3) Penasihat suggester + NADI summary in-product
Technical Implementation	Append-only ledger · HMAC webhooks · argon2 · role-scoped portals · Postgres streaming replication · documented scale path
Multi-Cloud Service Usage	AWS (compute · DB · S3) + Alibaba Cloud (Function Compute · Qwen LLM · OSS) — Gold + Platinum sponsors actively used · failover tested
Impact & Feasibility	NADI Felda Gedangsa pilot · 188 NADIs nasional · 2.9M B40 households · existing institutions composed
Presentation & Teamwork	600-line PRD · 1,400-line multi-cloud setup guide · 8-slide deck · 4-min narration · maji-core coordinator

Mari saya tunjuk

Daftar | **Cipta pool** | **Lock + invite** |

Sign up · individual PayLater displayed | Nama · need · members 1/8 | Combined cap RM 1,800 |

Penasihat | **Pool vote** | **Repayment** |

5 BM suggestions via Alibaba Qwen | 3-of-4 majority · TNG approval | Ledger green · kampung trust score 87 |

Two Clouds. Both Sponsor-Aligned.

AWS (*Gold sponsor*) - EC2 t3.medium × 3 (HA cluster · Cloudflare-fronted) - PostgreSQL 17 (streaming replication primary → 2 replicas) - S3 (assets + backup) - CloudFlare LB + auto-failover

Alibaba Cloud (*Platinum sponsor*) - Function Compute (Penasihat · NADI summary) - Qwen-plus LLM (BM-native) - Object Storage Service (cross-cloud DR backup mirror)

Ops profile: Backend: **Hono + Prisma + Postgres 17** · Frontend: **Next.js 15 + React 19 + Tailwind v4** · AI fallback: **Anthropic Claude** when Alibaba 5xx · Caddy reverse proxy · Docker Compose · GitHub Actions release pipeline → GHCR.

Tiga server. Auto-failover via Cloudflare. Multi-cloud orchestration real, not theatre.

We're Standing on Lineage

Reference	Region	Raised	Mechanic
MoneyFellows	Egypt	USD 31M	Communal financial digitization
Esusu	USA	~USD 1B valuation	Trust-score for invisible populations
Stokfella	South Africa	Regional leader	Stokvel digital ledger
Easypaisa Pool Buy	Pakistan	Mobile-wallet group purchase	Direct pool-PayLater precedent

*Pool credit dah scale di Mesir, Amerika, Afrika Selatan, Pakistan. Malaysia ada TNG. Malaysia ada NADI. Malaysia ada MyKasih. **DuitLater is the wiring.***

What We Need From You

1. **TNG** PayLater sandbox API access untuk pool transaction flow. Risk model real, bukan simulated.
 2. **MCMC / NADI** Formal collaboration framework dengan NADI Selangor — 84 centres ready as distribution channel.
 3. **MyKasih Foundation** Merchant network access + MySARA catalogue API untuk last-mile fulfilment.
- Pitch:** Ijam · zarulijam@gmail.com **Backend:** Mung · **Frontend:** Akmal · **PM:** Kairu · **Design:** MatNep **Repo:** github.com/Zen0space/R2-D2-Finhack

Tiga institusi Malaysia. Satu produk yang TNG boleh ship. Empat juta isi rumah B40 yang akan akses kapasiti kewangan kolektif buat pertama kali.

Sendiri tak mampu, ramai-ramai boleh.

Terima kasih.
